Examiner's Amendment

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Brian L. Klock on 3/29/2007.

2. The application has been amended as follows:

Change claim 21 to:

An image processing method for use in a printer driver for use with a device having an operating system, a forgery preventing module, and a display driver said method comprising the steps of: the printer driver receiving an instruction for a printing process, judging whether an image corresponding to an image signal developed represents a specified image according to the printing process, and outputting a result obtained in said judging step so as to use the result in a processing of said image signal; wherein the forgery preventing module in the operating system outputs an instruction for executing a predetermined display to the display driver according to the result obtained in said judging step and output in said outputting step.

Art Unit: 2625

Change claim 47 to:

An image processing method for use in a printer driver for use with a device having an operating system and a forgery preventing module, said method comprising the steps of: the printer driver receiving an instruction for a printing process, judging whether an image corresponding to an image signal developed represents a specified image according to the printing process, and outputting a result obtained in said judging step so as to use the result in processing of said image signal; wherein the forgery preventing module in the operating system outputs an instruction for terminating a spooling operation according to the result obtained in said judging step and output in said outputting step.
